* The estimated value for heating fuel is based upon the overall square footage of living space delivered from the factory. The discount given varies from \$3,200 - \$5,000 depending on the size of the home. Estimated usage of 850 - 1,200 gallons at an average price of \$4 per gallon. Heating fuel only - not fuel for appliances, fireplaces, etc. To qualify, a Building Agreement must be in place by August 1, 2008 and home delivery must be taken by November 30, 2008.
